Pyramid's TimeTrax Sync Wireless "Clocks in a Box" bundle is all you need to get your facility clocks working on the same time. This pre-engineered solution will get your facility up and rolling quickly at an affordable price. For convenience and true plug-and-play installation, everything you need is all in one box. The dependable 915MHz radio frequency transmits a signal to wireless system clocks. It is ideally suited for corporate, industrial, healthcare and schools. The system time source is NTP with optional GPS. Bell scheduling is also available making the "Clocks in a Box" the perfect starter solution for all your synchronized timing needs.

1-WATT WIRELESS RF MINI-TRANSMITTER

- 128 channel 902-928MHz frequency-hopping technology
- Send RF time signal to an unlimited number of clocks
- Battery backup for maintenance-free use should power fail
- Time source captured from NTP or optional GPS
- Scheduling software controls optional synchronized system bells

13" STANDARD WIRELESS ANALOG CLOCK

- Automatically adjusts for Daylight Savings Time
- Up to 10-years of maintenance-free Lithium battery life
- Durable ABS frame and shatterproof polycarbonate lens
- Automatic synchronized time calibration
- Modern styling and low profile design

4" — 4 DIGIT RED WIRELESS DIGITAL CLOCK

- Automatically adjusts for Daylight Savings Time
- Viewable up to 160-feet
- Durable ABS frame and shatterproof polycarbonate lens
- Automatic synchronized time calibration
- Modern styling and low profile design

OPTIONAL SYSTEM ADD-ONS

- GPS Signal Receiver
- Bell Ringer Relay (110v)
- 6" Bell (110v)
- Additional analog and digital clocks with various styles
